Salary ranges can vary widely depending on a number of factors, including but not limited to prior education, certifications, additional skills, number of years spent practicing, geographic location, and place of employment. National salary estimates may not reflect local and/or short-term economic or job conditions, do not guarantee actual salaries, and are subject to change.

In 2019, BLS reported 211,300 nurse practitioner jobs in the U.S. This is expected to grow by 52% to 322,000 by 2029.$8

BLS projects about 24,200 openings for nurse practitioners each year, on average, over the next decade.$8
